

# Cupid's Number Matchup Game

**Directions:** Cut along the dashed lines and spread out the cards facedown on a flat surface.

**How to Play:** Explain to children that, for each card that shows a number, there is a "match" for that card that shows the same number of arrows. Once kids understand how to play, have them take turns flipping over two cards at a time. If the cards make a "match," then the child keeps the cards to make a pair. If not, the child turns the two cards facedown, and another player takes a turn. Play continues until all pairs are found!

**Note:** For younger kids, you may want to keep the number cards separate from the value cards or use only five sets of cards at a time for easier play.
