

EVERGREEN SHELVING

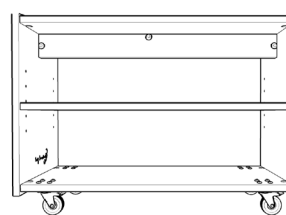

Description

As space and storage efficiency in your classroom is so important, Natural Pod has designed modular and flexible solutions in differing sizes to create numerous configurations to suit differing needs. All our furniture pieces are dual or multi purpose, and our shelving is the same. Our larger pieces are very space efficient, completely movable with lockable castors and can be configured in differing spaces to create room division or space dividing.

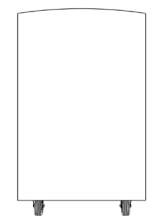

All our shelving is highly durable and stable, and suitable for use in grade schools, early learning, kindergarten, preschool, daycare, further education and home use.

Product features
