

## Description

Children love rocking back and forth in the **rocking boat**, both on their own and with friends. Turn it over and it becomes a bridge to a magical land. Pre-walkers can practice their crawling, climbing and navigation skills while they develop coordination and strength. Slightly older children love walking up and down and using the steps as seating.

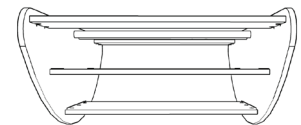

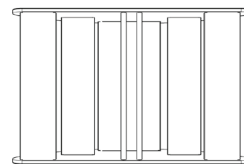

The **Rocking Boat and Stairs** is the perfect open-ended play piece for early childhood spaces. Children can transform it into a store front, or a bridge to a magical land. When not in direct use, it can easily be placed on its side and pushed against a wall where it can double as a display shelf.

## Product features

- Edges all smoothed and finished
