

WONDER LOFTS

Description

The **Christene Loft** is one of our most popular lofts. It works well in a variety of large spaces as the placement of the stairs can be positioned on either the front or side of the structure. This truly is a two story loft; children love having a whole second level of play, while creating an entirely different world beneath.

Natural Pod™ Play lofts were designed with the needs of learners in mind. They were intentionally designed to provide endless invitations for open-ended play where children can express themselves freely and let their imaginations transform the space into anything they wish; whether a fort, a castle, a reading nook, an enchanted forest, or perhaps a magical cave. Named after the educators whose own imaginations inspired them, each Natural Pod™ Play Loft is unique, beautiful, sustainable and extremely durable. They are designed to suit multiple space configurations and various stages of child development.

Product features

- Edges all smoothed and finished
- Can be free standing (does not need to be anchored to a wall)
- Weight tested up to 3,400 lbs

Materials

- Europly FSC certified hardwood plywood (FSC R 012337)
