

Description

The **Infant Loft** is our smallest loft, specially designed for the littlest ones and therefore perfect for daycares and pre-kindergarten spaces. It is low to the ground with 2 steps up on one side and a long shallow ramp on the other.

Natural Pod™ Play lofts were designed with the needs of learners in mind. They were intentionally designed to provide endless invitations for open-ended play where children can express themselves freely and let their imaginations transform the space into anything they wish; whether a fort, a castle, a reading nook, an enchanted forest, or perhaps a magical cave. Named after the educators whose own imaginations inspired them, each Natural Pod™ Play Loft is unique, beautiful, sustainable and extremely durable. They are designed to suit multiple space configurations and various stages of child development.

Product features

- Edges all smoothed and finished
- Can be assembled right or left sided
- Small sized loft suitable for infants
