

Description

The **Half Loft** is a great option for spaces that want to utilize their vertical height, but don't have an abundance of floor space for our largest floor prints. Half the size of our Christine Loft, this model gives children both a play space atop the platform and underneath it.

Natural Pod™ Play lofts were designed with the needs of learners in mind. They were intentionally designed to provide endless invitations for open-ended play where children can express themselves freely and let their imaginations transform the space into anything they wish; whether a fort, a castle, a reading nook, an enchanted forest, or perhaps a magical cave. Named after the educators whose own imaginations inspired them, each Natural Pod™ Play Loft is unique, beautiful, sustainable and extremely durable. They are designed to suit multiple space configurations and various stages of child development.

Product features

- Edges all smoothed and finished
- The steps can be positioned either on left or right side
- Very compact, perfect for placement in limited spaces

Materials

- **Europly FSC** certified hardwood plywood (FSC R 012337)
