

### WONDER LOFTS

#### Description

The Rick's Loft has a square footprint, especially designed to fit in nook's or tighter spaces. It is lower to the ground than other lofts and has both a ramp and a three step stair case on the front, allowing smaller children to enjoy a circuit of climbing and sliding down without creating a bottle neck.

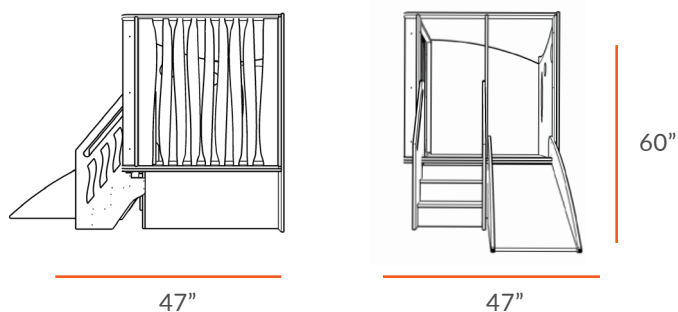

Natural Pod™ Play lofts were designed with the needs of learners in mind. They were intentionally designed to provide endless invitations for open-ended play where children can express themselves freely and let their imaginations transform the space into anything they wish; whether a fort, a castle, a reading nook, an enchanted forest, or perhaps a magical cave. Named after the educators whose own imaginations inspired them, each Natural Pod™ Play Loft is unique, beautiful, sustainable and extremely durable. They are designed to suit multiple space configurations and various stages of child development.

#### Product features
