

Pumpkin Patterns

Materials Needed:

- Stencil of choice
- Pumpkin carving knife
- Masking Tape
- Large toothpick
- Spoon

Carve a circular shape at the top of the pumpkin. Be sure to angle the knife about 45 degrees. Remove all of the interior. Use the spoon to scrape the sides for a clean look.

Begin by taping the printed stencil onto the pumpkin.

Using the toothpick, begin to pin-prick the outline of the stencil.
(Tip: be sure to press as far down with the toothpick as possible)

Remove the stencil once all of the shapes have been pin-pricked. Using your knife carve along the pin-prick points removing each piece as you go.
