

# Addition Wrap-Around Game

## Teacher Directions:

1. Print out and cut apart the cards. (Laminate the printouts before you cut them if desired.)
2. Distribute one card to each student. (If there are more cards than students in your class, pass out an additional card to each student until all of the cards have been distributed.)
3. Invite any student to read the question on her card.
4. The student with the correct answer calls it out. Then he reads the question on his card.
5. Players continue to ask and answer questions until the game wraps around the classroom—and ends with the student who started it.

**Addition**

**I have  
32.**

**Who has  
 $12 + 8?$**
