

# Digraph Memory Match

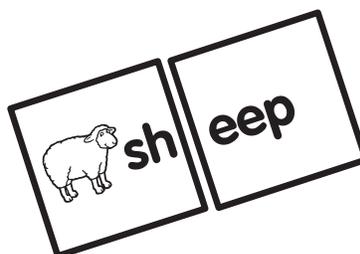

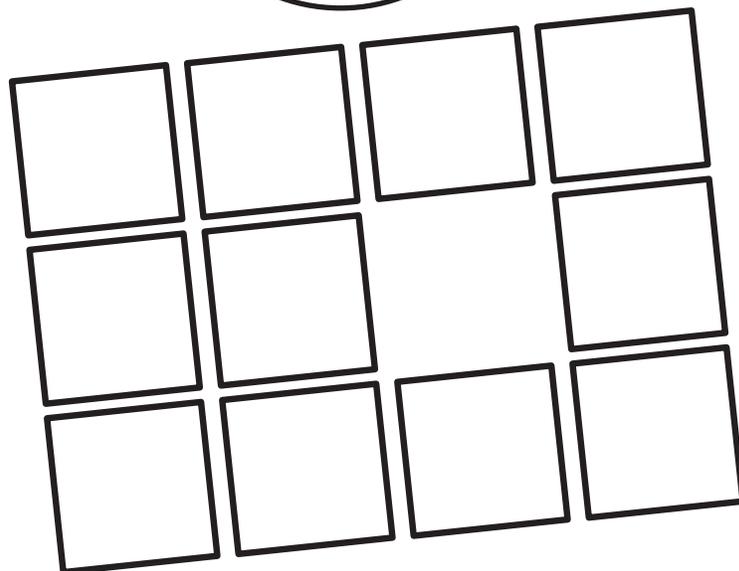

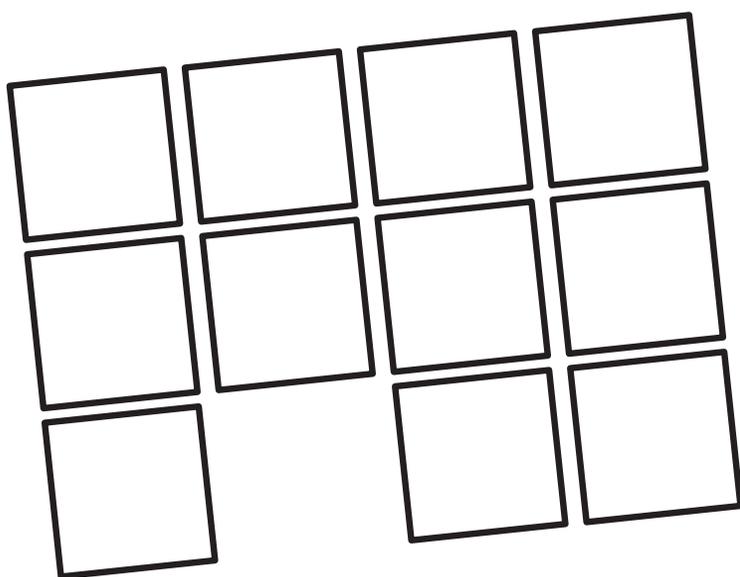

## Blends and Digraphs

### Instructions:

Cut out the digraph and ending cards along the dotted lines. Arrange the cards randomly in two memory-game grids, keeping the two types of cards separate—the digraph cards (the ones with the pictures) in one group and the ending cards in the other. Turn the cards facedown. Flip over two cards—one from each group—and try to match up a digraph with a word ending to build the word that matches the picture on the digraph card. If you find a match, keep the cards. If not, flip the cards back over and choose again. Keep playing until you have found all 12 matches!

### Helpful Hint:

Remember, a digraph is a pair of letters that make one sound. The most common consonant digraphs are "ch," "sh," "th," and "wh," like "chease," "sharp," "thorn," and "whistle."
